Upstream Energy

The Upstream Energy team's technical knowledge and 'on the ground' local expertise means that UIB has developed innovative risk solutions for energy risks throughout the world, including:

COVERAGE PLACED

- All Risks of Physical Damage to on and offshore operating property
- Onshore and offshore Construction All Risks/Minor Works
- Liability/Casualty
- Protection and Indemnity
- Removal of Wreck
- Sue and Labour
- Onshore and offshore Operators' Extra Expenses
- Machinery Breakdown
- Platform de-commissioning and removal
- Seepage & Pollution – sudden & accidental or gradual occurrence
- Strikes, Riots and Civil Commotion
- Loss of Production Income
- Transit/Storage
- War/Terrorism
- Further risks arising from the upstream energy area can be considered

Energy companies operate in a high risk-world, often in the most hostile environments. There is increasing pressure to deliver low-emission products and investment in technological developments while facing the constant challenge of maintaining profitability against the backdrop of volatile oil prices.

Appropriate risk management and secure, cost-effective insurance coverage placed with insurers with robust minimum security requirements are key components for stability and success. UIB Energy has developed a worldwide reputation for technical skill and integrity when acting for energy project partners to analyse, design and place comprehensive risk solutions.

A GLOBAL PARTNER

The size and scale of upstream energy and power generation projects require an insurance broker with global capabilities. UIB Energy, with an international network of offices and strong relationships with insurers worldwide, draws on many years of experience to address complex technical risk issues and develop cost-effective risk and insurance solutions.

Supplementing our expertise, we utilise the services of our in-house risk engineering team, Engineering Risk Consultants (ERC) a leading international energy risk surveyor, to carry out risk surveys and advice on risk engineering matters.

ABOUT US

UIB Energy consists of two separate servicing teams split into the downstream/power generation division and the upstream division.

UIB Energy Upstream division's clients include:

- Operators and participants in the exploration, development, and production of oil and gas projects
- Contractors including onshore and offshore drilling units
- Pipeline and terminal operators
- Geothermal projects

Power

The global power sector is undergoing rapid transformation. With increasing demand for energy, a shift toward renewables, aging infrastructure, and regulatory pressures, the risks facing power producers and distributors are more complex than ever. Volatility in energy prices, extreme weather events, and evolving cyber threats only add to the uncertainty. In this dynamic environment, having a strategic insurance partner is essential to protect your assets, revenue, and long-term resilience.

Our deep industry knowledge allows us to offer comprehensive coverage against the unique risks facing the power generation and distribution industry, including equipment breakdowns, natural disasters, liability claims, and business interruptions. We understand that when your operations are compromised, so is your revenue — that’s why we act quickly to ensure your continuity.

WE PLACE COVERAGE FOR...

- **Fossil Fuel-Based Power**
 - Coal-fired power
 - Natural gas power
 - Oil-fired power
- **Renewable Energy Power**
 - Solar power
 - Wind power
 - Onshore wind
 - Offshore wind
 - Hydropower
 - Conventional
 - Pumped storage
 - Biomass power
 - Geothermal power
- **Nuclear Power**
- **Emerging & Alternative Power Sources**
 - Tidal power
 - Wave power
 - Hydrogen
 - Waste-to-energy (WTE)

COVERAGE PLACED

- Onshore/offshore property and infra-structure
- Business Interruption and Income Loss
- Construction and Delay in Start up
- Third Party Liability
- Political Violence
- Cyber
